PROFESSIONAL SUMMARY

Informatics Engineering student at Jember State Polytechnic, and an Web Developer specializing in Frontend Engineering. I apply my understanding of design principles to bridge the gap between code and aesthetics. Currently seeking a role where I can focus on client-side development, crafting responsive and visually compelling interfaces with a strong emphasis on UI/UX.

TECHNICAL SKILLS

Personal	: Communication & Team Collaboration, Adaptability & Problem Solving, Time Management.
Tech Stack	: HTML5, CSS3, JavaScript, PHP, Laravel, React, Tailwind CSS, Bootstrap, MySQL.
Tools	: Git, GitHub, Visual Studio Code, Figma.
Language	: Indonesian, English

WORK EXPERIENCE

Cafe Love Jamu – *Sidoarjo, East Java*   Okt 2024 – Present
Graphic Design (Freelance)

- Create engaging visual content for social media platforms (Instagram/TikTok) to increase brand awareness and customer engagement.
- Design marketing collateral such as menus, banners, brochures, and product catalogs using Canva and Figma.
- Develop packaging designs and labels for new herbal product lines to ensure a professional and attractive product presentation.
- Collaborate with the business owner to translate marketing concepts into consistent visual identities across all media channels.

PT. Solusi Identitas Global Net – *Sidoarjo, East Java*   Agu 2025 – Des 2025
UI/UX Designer (Internship)

- Designed and prototyped user-friendly interfaces for web-based applications using Figma, ensuring alignment with user needs and project requirements.
- Created wireframes, user flows, and site maps to visualize design concepts and streamline complex information structures.
- Contributed to the development of design systems, including color palettes, typography, and iconography, to maintain visual consistency across products.
- Collaborated closely with the development team to ensure accurate design implementation and smooth handover process.

Cafe Love Jamu – *Sidoarjo, East Java*   Okt 2022 – Okt 2024
Herbal Barista (Part Time)

- Prepared and served a variety of traditional herbal beverages (Jamu), ensuring consistent taste and high-quality presentation standards.
- Managed inventory procurement for the main cafe and branch locations to ensure optimal ingredient availability and minimize waste.
- Maintained a clean and hygienic environment while providing excellent customer service to enhance the guest experience.

KEY PROJECTS

CafeJamu App & Ecosystem – *Full Stack Developer & UI/UX*   Jan 2024 – Mar 2024
Tech Stack: Laravel, Tailwind CSS, MySQL, Figma

- Engineered a complete digital ecosystem (Mobile App & Website) for Cafe Love Jamu to streamline ordering and product showcasing.
- Led the UI/UX design process, creating high-fidelity prototypes in Figma that aligned with the cafe's brand identity.
- Developed both frontend interfaces and backend logic, creating a seamless connection between the user app and the admin dashboard.
- Conducted comprehensive system testing to ensure data synchronization accuracy between the website and mobile app.

Desa Sidokerto Website – *Frontend Web Developer*   Agu 2023 – Des 2023
Tech Stack: HTML, CSS, JavaScript, PHP, MySQL

- Built a responsive village information website to improve public transparency and service accessibility.
- Translated UI/UX wireframes into clean, semantic code using HTML, CSS, and JavaScript.
- Ensured cross-browser compatibility and optimized page load speeds for better user experience.

SmartDesa – *Mobile App Developer*   Agu 2023 – Des 2023
Tech Stack: Flutter, Firebase

- Conducted user research to understand the specific needs of village residents, translating them into key mobile app features.
- Developed the mobile frontend interface, ensuring a responsive and accessible design for various device sizes.
- Participated in the full software development lifecycle (SDLC), from UI/UX design to final testing and bug fixing.

MySPP Desktop – *Desktop App Developer* Jan 2023 – Mar 2023
Tech Stack: Java, MySQL

- Designed the user interface (UI) to create an intuitive payment recording experience for school administration.
- Implemented core database functionalities (CRUD) for managing student data and tuition payment history.
- Optimized the application flow to minimize user error during data entry.

UKM Sembako – *Desktop App Developer* Agu 2022 – Des 2022
Tech Stack: Java, MySql

- Developed a desktop-based inventory management system to assist local SMEs in recording stock and transactions.
- Designed and implemented the database schema using MySQL to ensure efficient data storage and retrieval.
- Collaborated with the team to identify bugs and performed rigorous unit testing to ensure software stability before deployment.

EDUCATION

Jember State Polytechnic – *Jl. Mastrip, East Krajan, Sumbersari, Jember, East Java 68121* Agu 2022 – Agu 2026
D4 Informatics Engineering PSDKU Sidoarjo | 3.74/4.00

- Active in research and technology development activities

SMAN 1 Panggul – *Jl. P. Sudirman 87 Panggul, Bodag, Panggul, Trenggalek, East Java 66364* Agu 2019 – Agu 2022
Natural Sciences (IPA)

- Actively participate in student activities in the fields of science and technology.
