PROFESSIONAL SUMMARY

Informatics Engineering student at Jember State Polytechnic, specializing in Fullstack Web Development. Proficient in building scalable and efficient web applications using the Laravel stack. Interested in UI/UX principles to create functional and intuitive digital solutions. Highly committed to code quality and ready to make professional contributions to software development.

TECHNICAL SKILLS

Personal	: Team Communication & Collaboration, Adaptability & Problem Solving, Time Management.
Technology Used	: HTML5, CSS3, JavaScript, PHP, Laravel, React, Tailwind CSS, Bootstrap, MySQL.
Tools	: Git, GitHub, Visual Studio Code, Figma.
Language	: Indonesian, English

WORK EXPERIENCE

Szona Rempah – *Sidoarjo, East Java* Okt 2024 – Jan 2026

Graphic Design (Freelance)

- Designed the brand's visual identity and comprehensive marketing materials (herbal product packaging, menus, and banners) using Canva and Figma.
- Created interactive visual content for social media (Instagram/TikTok) to organically increase brand awareness and customer engagement.
- Collaborated directly with business owners to translate marketing strategies into consistent graphic designs across physical and digital channels.

PT. Solusi Identitas Global Net – *Sidoarjo, East Java* Agu 2025 – Des 2025

UI/UX Designer (Intern)

- Design wireframes, user flows, and interactive prototypes for web-based applications using Figma to align with project requirements.
- Build and maintain a design system (including color palettes, typography, and iconography) to ensure consistent user interfaces across products.
- Collaborate closely with the development team during design handoffs to ensure accurate interface implementation on the frontend.

PROJECT

Expert System Website (Screening) – Relasibaik – *Full Stack Web Developer* Jan 2026 – Mar 2026

Technologies: *Laravel, Tailwind CSS, PostgreSQL, Figma*

- Designed and developed an end-to-end web-based expert system utilizing the Rule-Based Reasoning method to facilitate the family relationship screening process.
- Built a robust backend architecture with Laravel and designed the relational database using PostgreSQL to efficiently process and manage expert system rules.
- Created UI/UX prototypes in Figma and translated them into a responsive frontend interface using Tailwind CSS, ensuring user comfort when filling out screening questionnaires.

Inventory Management System Website - Niko Teknik – *Full Stack Web Developer* Mar 2026 – May 2026

Technologies: *Laravel, Tailwind CSS, MySQL, Figma*

- Designed and developed an end-to-end inventory management information system to systematically monitor the flow of incoming and outgoing goods.
- Built a responsive frontend interface with Tailwind CSS and designed the backend architecture using Laravel for efficient data management.
- Created intuitive UI/UX prototypes in Figma to minimize human error when staff record and manage item data.

Point of Sale (POS) Website – Szona Rempah – *Full Stack Web Developer* Jan 2026 – Mar 2026

Technologies: *Laravel, Tailwind CSS, MySQL, Figma*

- Developed a web-based Point of Sale (POS) application to accelerate the recording process of daily store transactions and sales.
- Designed a relational database with MySQL and integrated it with Laravel's backend logic to manage price calculations and inventory.
- Implemented a clean and efficient user interface design to speed up cashier navigation, especially when serving customers during peak hours.

Information System Website – Cafe Love Jamu – *Full Stack Web Developer* Jan 2024 – Mar 2024

Technologies: *Laravel, Tailwind CSS, MySQL, Figma*

- Built a full-stack website to digitize the herbal drink product catalog and professionally display the cafe's business profile.
- Developed a secure admin dashboard using Laravel to enable the owner to independently manage menu updates, pricing, and operational information.
- Led the UI/UX design process and translated it into a responsive frontend to provide an optimal browsing experience for customers across various devices.

- Developed a dynamic village profile and information website based on PHP and MySQL to improve transparency and accessibility of public services.
- Wrote clean and semantic frontend code (HTML, CSS, JavaScript) to ensure the site interface can be seamlessly accessed via mobile and desktop devices.
- Optimized page load performance and ensured cross-browser compatibility to enhance the overall user experience.

EDUCATION

Jember State Polytechnic – Jl. Mastrip, East Krajan, Sumber Sari, Jember, East Java 68121	Agu 2022 – Agu 2026
Bachelor of Applied Science in Informatics Engineering 3.74/4.00	
SMAN 1 Panggul – Jl. P. Sudirman 87 Panggul, Bodag, Panggul, Trenggalek, East Java 66364	Agu 2019 – Agu 2022
Natural Sciences
